

A vertical box plot is centered on the left side of the plot area. The box is white with a black border. A solid orange horizontal line is positioned at approximately 40% of the box's height from the bottom, representing the median. A dashed green horizontal line is positioned at approximately 35% of the box's height from the bottom, representing the mean. The box extends from approximately 30% to 70% of the vertical axis. Whiskers extend from the top and bottom of the box to horizontal caps at the top and bottom of the plot area. At the bottom of the lower whisker, there is a stack of eight small black rectangles, each with a white horizontal line through its center, stacked vertically.
